

problem with medion lifetab p9516

Posted by kada - 26 Jul 2013 04:31

Hello everyone, am new here

i have a problem with a medion lifetab p9516, it start with the google account and password and i can not enter to the main menu

i'll appreciate any help to fix this problem if it is one

thank you every one

=====

I've never had such problem.

Could be that your tablet cannot get connected to WiFi.

Did you try to skip the Google account connection and go further to the main screen?

Yves

Hi,

I've heard, that this happens if you're using a password/pin/pattern and you've entered the wrong credentials too many times.

Is this your tablet?

Micky
