
The most stupid tool ever made (Black & Decker)

Posted by Ralph - 2008/04/07 10:55

Black & Decker AAW100 8-Inch Auto Wrench Adjusting Wrench

Just a waste on an environmental and on money standpoint, this tool is for lazy people who can afford to lose money. Most of the time that tool does not tighten the screw enough, so that you have to tighten it by hand as with a normal adjusting wrench !

Not to speak about the batteries that will be used only from time to time, getting weak without usage.

Not to be recommended ! http://www.avi-plus.com/images/fbfiles/images/Black_Decker_Automatic_Wrench.jpg
