---

Internet browsers displays only blank pages (IE, Firefox ...)

You could try the following to bring back the browser service, if it's not a connection or dns issue:

1. in the cml run "regsvr32 actxprxy.dll" and "regsvr32 shdocvw.dll"
2. reboot windows

If the above couldn't fix the issues, run the following extra commands:

```
regsvr32 mshtml.dll
regsvr32 urlmon.dll
regsvr32 msjava.dll
regsvr32 shdocvw.dll
regsvr32 browseui.dll
regsvr32 actxprxy.dll
regsvr32 oleaut32.dll
regsvr32 shell32.dll
and restart the system once again
```
